

OVERALL APPROACH TO RISK ASSESSMENT POLICY

Stepping Stones

Updated: June 2022

At Stepping Stones Nursery we take all reasonable steps to ensure staff and children in our care are not exposed to risks. We promote the safety of children, parents, staff and visitors by reviewing and reducing any risks.

Risk assessments

Risk assessments document the hazards/aspects of the environment that needs to be checked on a regular basis. These include who could be harmed, existing controls, the seriousness of the risk/injury, any further action needed to control the risk, who is responsible for what action, when/how often will the action be undertaken, and how this will be monitored and checked and by whom.

The nursery carries out written risk assessments regularly (at least annually). These are reviewed regularly and cover potential risks to children, staff and visitors at the nursery. When circumstances change in the nursery, e.g. a significant piece of equipment is introduced or new activity/experience; we review our current risk assessment or conduct a new risk assessment dependent on the nature of this change. These are “long-term” risk assessments, and a file is maintained in the Office.

Daily risk assessments are conducted by staff in each room to ensure that the room is safe for use on given days. If staff members/parents have any concerns regarding safety or a potential risk then they should speak to Management immediately.

All staff are trained in the risk assessment process to ensure understanding and compliance of how they manage risks. All outings away from the nursery are individually risk assessed and adequately staffed with paediatric first aid trained practitioners. For more details, please refer to the visits and outings policy.
